Agrico offers...

...the next generation potatoes.

Agrico UK invite you to join them for their
Potato Variety Open Days

This year on display we have 23 varieties, which includes 7 of our "next generation" portfolio.

The "next generation" variety portfolio offers salad, table white, table red, chipping and crisping varieties. All have late blight resistance, high yield potential and great taste.

They offer the grower the potential to improve margins by reducing routine preventative spraying and saving input costs.

Regular guided tours of the trial plots will take place over the 2 days, including specialist technical advice.

Complimentary lunch and refreshments will be available.

RSVP by 30th August 2021
